

# Canary

**Lifespan: 7-12 years**

**Feed: Canary seed**

**Description:** The most common canaries are bright yellow, but they can come in a variety of colors depending on the species.

**Overview:** Canaries have excellent personalities and beautiful singing voices. They have been kept in captivity for centuries almost solely for their wonderful songs. Although a canary has an average lifespan of ten years, they have been known to live as long as 22 years. Any canary brought into a home is ready to lighten the atmosphere. They are the perfect compliment to any home. They should have a large cage with room to fly.
